Summary

On this nine-birding-day tour, six birders from the United Kingdom and two birders from the United States, with their Panamanian guide, Nando Quiroz, recorded 305 species of birds (14 heard only), 12 species of mammals, and countless numbers of butterflies and moths. The group visited a wide variety of habitats on both sides of the Panama Canal and had good luck seeing all species of manakins, motmots, and puffbirds that normally occur in the areas visited. Two highlights of the trip were a visit at Cerro Azul to feeders of friends of our leader, where we were treated to eye-popping views of hummingbirds, honeycreepers, and tanagers, and a morning spent

at the San Francisco Reserve near Tortí, where we had our best luck with raptors, including a Black Hawk-eagle, northward-migrating flocks of Mississippi Kites, and a bonus bird in the form of a distant perched and hunting Harpy Eagle.

Highlights

Great Tinamou: a very close individual observed hiding along Pipeline Road and another totally unconcerned individual along Plantation Road

Swallow-tailed Kite: 19+ at Nusagandi

Mississippi Kite: flocks of hundreds over the San Francisco Reserve

Harpy Eagle: seen by three participants and the guide; photographed

White-throated Crane: nice views while enjoying lunch at Gamboa

Blue-headed Parrot: a video was obtained of a pair mating at Metropolitan National Park

Mangrove Cuckoo: nice views of a pair in the mangroves near El Guineo

Spectacled Owl: a brief view of an adult and a long view of an immature at Summit Ponds

White-collared Swift: flocks of 50+ at San Francisco

Scaly-breasted Hummingbird: leisurely views while we had lunch at Torti

Tody Motmot: a long search at Cabuya in Antón on the property of a friend of the leader succeeded

Plain Xenops: high numbers were seen of this normally scarce species

Moustached Antwren: point-blank views at ankle-level of a pair of this minute species

Jet Antbird: extended effort at Lake Bayano produced a pair

White-bellied Antbird: a singing male was a treat at Metropolitan National Park

Yellow-green Tyrannulet: this species is endemic to the area

Scale-crested Pygmy-Tyrant: close views of this tiny species

Southern Bentbill: this species showed its namesake downcurved bill

Royal Flycatcher: extended views of a male visiting a nest hanging over a stream at San Francisco

Song Wren: watched a pair foraging like mice under fallen leaves

Yellow Warbler: northern migrants as well as the rufous-headed "Mangrove" race

Bay-breasted Warbler: the most abundant Nearctic warbler species seen during our visit
